

BlackRock's \$2.1 Trillion Move

Your Investment Education Workbook

Companion guide to the video by Felix Prehn

This workbook is designed to help you organize your thoughts, assess your portfolio, and develop your own investment education strategy based on the concepts presented in the video.

How to Use This Workbook

Welcome! This workbook is designed to help you get the most value from the BlackRock video you just watched. It's not about telling you what to do with your money—that's between you and your financial advisor. Instead, it's about helping you *think* about the concepts and how they might apply to your situation.

This workbook will help you:

- Organize key concepts from the video
- Assess your current investment knowledge and portfolio
- Ask yourself important questions about your investment education needs
- Create a personal learning and research plan

 **Important:** This workbook is for educational purposes only. It does not provide financial advice. All investment decisions should be made in consultation with a qualified financial advisor. All investments carry risk of loss.

What Did BlackRock Actually Do?

The Truth vs. The Headlines: BlackRock didn't pull \$2.1 trillion completely out of America. They repositioned their portfolio by underweighting long-term US Treasury bonds and increasing international diversification while remaining overweight US stocks.

 **Reflection Question #1:**

Before watching the video, what was your first reaction to hearing "BlackRock moved \$2.1 trillion out of America"?

After watching the video, how has your understanding changed?

The Three Big Shifts

Shift	What It Means
1. Weakening Dollar	The US dollar dropped 9.4% in 2025, making international investments potentially more valuable for US investors
2. International Markets	International stocks returned 29.2% vs. S&P 500's 16.39% in 2025—a major reversal from the previous decade
3. Bond Market Changes	With \$38.43 trillion in US debt, long-term Treasury bonds face different dynamics than in the past

🤔 Reflection Question #2:

Which of these three shifts surprises you most? Why?

Your Portfolio Self-Assessment

Understanding where you are is the first step in any investment education journey. Answer these questions honestly—this is for your eyes only!

Current Portfolio Analysis

Portfolio Breakdown:

Estimate what percentage of your investable assets are in each category:

Asset Category	Your Current %
US Stocks (S&P 500, individual stocks, etc.)	
International Developed Markets (Europe, Japan, etc.)	
Emerging Markets (China, Brazil, India, etc.)	
Bonds (Government, Corporate, etc.)	
Gold/Precious Metals	
Cash	
Other (Real Estate, Crypto, etc.)	
TOTAL	100%

🤔 Reflection Question #3:

Looking at your breakdown above, are you surprised by how concentrated or diversified you are?

Investment Knowledge Check

Rate your current understanding of these concepts (1 = "What's that?" to 5 = "I could explain it to someone else"):

Concept	Rating (1-5)
How currency exchange rates affect international stock returns	
The difference between developed and emerging markets	
How bond prices relate to interest rates	
Why gold might serve as an inflation hedge	
What P/E ratios tell you about valuations	

🤔 Reflection Question #4:

Which concept above do you most want to learn more about?

How could understanding that concept better help you make more informed investment decisions?

The Five Opportunities

The video discussed five potential opportunities based on current market trends. For each, note if this is something you want to research further:

- ☐ **International Equities** - ETFs like EFA, VEA, IEUR for developed markets; VWO, IEMG for emerging markets
- ☐ **Gold & Precious Metals** - ETFs like GLD, IAU for gold; GDX for gold miners
- ☐ **Selective US Stocks** - Focus on dividend growers (VIG, SCHD) and AI implementation companies
- ☐ **Sector Rotation** - Energy (XLE), Utilities (XLU), Financials for different economic scenarios
- ☐ **Alternative Income** - Corporate bonds (LQD), international bonds (BNDX), REITs (VNQ)

Your Personal Action Plan

Based on the video's 6-step action plan, here's how you might approach building your investment knowledge:

Step 1: Assess Your Current Situation

Questions to Ask Yourself:

1. How many years until I need to access this money? _____ years

2. How would I react if my portfolio dropped 20% in a month?

.....

3. What am I trying to achieve with my investments?

.....

.....

Step 2: Identify Knowledge Gaps

What topics do you need to research and learn more about before making any changes? (Check all that apply):

- ☐ How ETFs work and their expense ratios
- ☐ Tax implications of international investments
- ☐ How to read financial statements and ratios
- ☐ Currency risk and how it affects returns
- ☐ Diversification strategies and correlation
- ☐ How to rebalance a portfolio
- ☐ When to sell an investment

Step 3: Questions for Your Financial Advisor

If you work with a financial advisor, consider asking these questions:

- ✓ Given my risk tolerance and timeline, does my current international exposure make sense?
- ✓ How do you think about currency risk when investing internationally?
- ✓ What's your view on gold as part of a diversified portfolio?
- ✓ Should I be thinking about sector rotation based on economic cycles?
- ✓ How often should we review and rebalance my portfolio?

Other questions I want to ask:

Step 4: Research Plan

My Learning Goals for the Next 30 Days:

- 1.
- 2.
- 3.

Step 5: Monitor and Learn

Set up a simple monitoring routine:

☐ Schedule: Check portfolio performance every _____ (weekly/monthly)

- ☐ Track: Dollar strength (DXY index), international vs US stock performance
- ☐ Learn: Read one investing article or watch one educational video per week
- ☐ Review: Quarterly check-in to see if my allocation still matches my goals

Step 6: Scenario Planning

Think through different scenarios and how you might respond (not a commitment, just mental preparation):

If This Happens...	I Would Consider...
Market drops 15%	
Dollar strengthens significantly	
Inflation rises above 4%	
International stocks outperform for 3 years straight	

Take Your Investment Education Further

You're tired of watching your money sit idle while inflation eats away at your purchasing power, aren't you? While others struggle with investment decisions, educated investors are building their knowledge with research-backed strategies. Felix & Friends provides educational resources and research to help inform your investment decisions.

With the Intelligence Bundle, you'll get:

-  2 Monthly Stock Research Reports - Analyzed using our fundamental criteria
-  Starter Stocks List - 12 companies we believe have strong fundamentals
-  Community Forum Access - Connect with fellow investors sharing strategies
-  BetterStocksGPT Searches - Access to our proprietary research tool
-  Bonus Reports - In-depth insights

Remember, all investing involves risk including potential loss of principal, and there's no guarantee any investment strategy will be successful. Past performance doesn't guarantee future results and all investments carry risk of loss.

Ready to enhance your investment education and research capabilities? Get access to the Intelligence Bundle and start building your investment knowledge.

Final Thoughts

Remember: The goal isn't to have all the answers right now. The goal is to ask better questions, seek out quality education, and make more informed decisions over time.

Investment success isn't about timing the market perfectly or finding the "next big thing." It's about understanding principles, managing risk, staying disciplined, and continuously learning.

Your future self will thank you for the education you invest in today.
